Hello, I am a truck driver and I benefit from the wheather stations on xmradio. I do a great deal of travelling and this is how I make my living to support my family. I listen to the wheather & traffic channels in order to see if I need to change my route into an area. This would hurt a great deal of other drivers if this channel were canceled. I know personally that many other drivers do benefit from this channel and would hate to see it disappear. This channel makes all of our lives much easier to live, since we can change our routs in ordre to avoid a large traffic delay and to check the wheater. Thank you ,
Mark Truitt
